REPORTER 5

TURN DATA INTO ACTION

Blend, create and visualize
actionable data

Why Reporter 5?

The latest version of Reporter introduces many improvements and powerful new features that make reporting and analysis easier than ever.

Modern and uncluttered, the updated user interface is intuitive for even new users. And its responsive design lets you access your reports from any mobile device.

Fresh Look

The new user interface is intuitive, and is responsive to allow access via computer or mobile devices

Data without Limits

Thanks to a memory use upgrade, Reporter 5 can process millions of records in mere seconds.

Robust Security

Admins can set data permissions on department, team, and individual levels

High-Indexed Datasets

Datasets enable users to access, analyze, and distribute curated data subsets at lightning fast speeds

Data Blending

See the whole picture: Mixing and matching data from different sources is now easier than ever

Endless Extensibility

Reporter 5 streamlines connecting to different databases and implementing plugin code
